

Dear Friends,

It is with great sadness that I write to inform you that my father, József Pető passed away on 21 February 2020, at the age of 83.

He has been loyal to the 5 ccm category all his life. At the height of his career, between 1968-1975, he won six gold medals in a series in the European Championships (1968-1973), and he set several world records. He also won five silver and two bronze medals.

In his home country, he was a multiple national champion.

With the death of my father, the speed model racing world has lost another one of its legendary figures.

Warm regards,

Gábor Pető
